

Accelerating inclusive, sustainable growth

Enclude is an advisory firm dedicated to building more inclusive and sustainable local economies. Our integrated **capacity and capital services** enable clients and partners to achieve sustainable business results as well as positive social and environmental outcomes.

CAPACITY SOLUTIONS

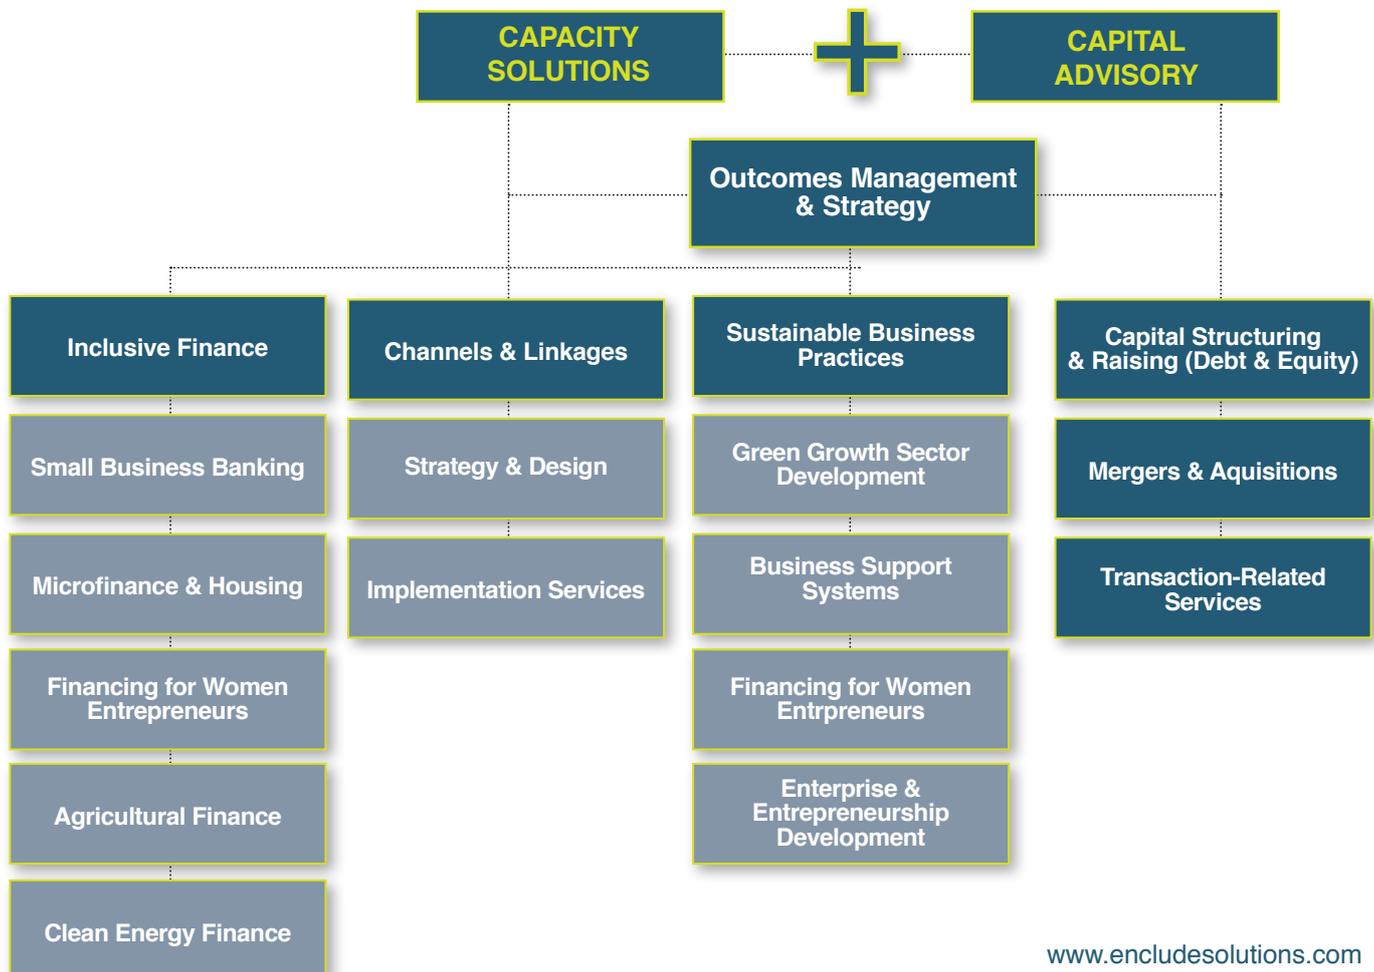

We work with financial institutions and other intermediaries serving small businesses, entrepreneurs, low- and moderate-income consumers, and other un(der)served groups to:

- increase their effectiveness and profitability
- design demand-driven products and programmes informed by global experience and tailored to local realities
- connect clients and their customers to needed financial and information services, often using technology platforms
- build local institutional capacity, peer networks, and systems for delivering long-term results

CAPITAL ADVISORY

We connect clients with the capital they need to finance their growth and link public, private, and philanthropic investors to investment opportunities that generate both financial returns and social value. Our Capital Advisory team can:

- secure the right type, amount, and cost of capital to support investees while meeting the return expectations of investors
- structure resilient investment vehicles to attract capital at scale
- monitor investment performance on financial, social, and environmental terms
- advise investors and investees on appropriate capital structures

SYNERGIES OF STRENGTH

Leveraging Triodos Facet and ShoreBank International's 20+ years of experience in finance, sustainability, and enterprise development, we equip clients, investors, and partners with the means to achieve greater reach, bottom-line profitability, and sustained social value.

ENGAGING GLOBALLY. DELIVERING LOCALLY.

Enclude's professionals work in five registered offices (Netherlands, United States, United Kingdom, Pakistan, India) and in project locations across the world, including Sub-Saharan Africa, Asia, Latin America and the Caribbean, Europe and Central Asia.

Our experienced, interdisciplinary practitioner teams have expertise in:

- financial product development and launch
- financial institution strategy, policy, and process improvement
- capital structuring and raising
- business and entrepreneurship support systems
- value chain strengthening
- green growth sector development
- distribution channel strategy and implementation for financial and other services, including branchless and mobile banking
- environmental and social performance management systems

To Enclude, inclusivity is more than financial inclusion — it is also expanding mobile banking to the poor, extending renewable energy to rural communities, and connecting farmers to modern dairy science.
